Put our 40 years of Custom and OEM experience to work for you.

Providing customized solutions in reagent development and production...

Focus on your core competencies and stay ahead of your competitors

Rely on us for:
- Enzymology expertise—cloning and protein expression, development work, and large scale fermentations
- Collaboration—application scientists work with your team throughout the process
- Customized formulations and pack sizes—bulk quantities, private labeling and package design, OEM, kitting and assembly

Ensure your success
- Strong customer loyalty—excellent Net Promoter Score of 60%+
- ISO 13485 certified quality system—multiple lot testing, customer-specific QC assays, General Purpose Reagents (GPR), and RUO available
- Documentation—lot number selection, batch records, and change control notification

Let us help you streamline workflow and develop custom solutions that suit the evolving needs of your business.

Get started today by emailing us at USBCustom@affymetrix.com or visit us at usb.affymetrix.com/OEM.
...with speed, compliance, and scalability.
